

BUSINESS HEALTH CHECK

When was the last time you reviewed the health of your business?

It's easy to get caught up in day-to-day operations, but it's essential to take time to work 'on' as well as 'in' your business to pinpoint key issues and opportunities.

Don't wait for the 'right time' to review your performance. Too often we spend months getting ready, only to have opportunities pass us by.

By working with one of our RightWay Business Advisors they will guide you through this highly practical and productive 90 minute Business Health Check. Take advantage of the chance to gain clarity on the key areas that will move your business forward.

A practical, thought-provoking process

Before our initial meeting, we will send you a series of diagnostics to complete so we can understand the current state of your business and readiness to change, uncovering key opportunities and issues.

Each diagnostic allows you to benchmark your business against global averages.

The diagnostic will be:

- Growth and Profit Diagnostic
- Change Readiness

Using the results from the diagnostics, one of our Business Advisors will facilitate a session to help you complete a **Now-Where-How** analysis to:

- Understand what's working and what's not in your business **now**
- Clarify **where** you want to be in the future based on your vision for the business
- Determine the three or four key strategies on **how** to get there and the actions you need to take to make it happen

Expect Practical Outcomes

You will walk away with a clear and concise report on the current state of your business outlining a summary of your Health Check results.

We will recommend strategies and actions to solve immediate problems and prepare your business to achieve future goals.
